

Fume Hood

Model No. PFH-0125

Laboratory fume hoods are designed to protect laboratory personnel by preventing contaminants such as chemical vapors, dust, mists and fumes from escaping into the laboratory environment. Laboratory fume hoods also provide lab personnel with a physical barrier to chemicals and their reactions. Fume hoods are evaluated each year to verify their proper operation. They are generally set back against the walls to cover up the exhaust ductwork. Because of their shape, they are generally dim inside but have a provision for a light source. The front opening is made up of glass, able to move up and down on a counterbalance mechanism.

The Presto Fume Hood has heavy Stainless Steel Construction 304 Grade, a small S.S. Sink, Water Tap, Water outlet provided. A sliding glass door moves vertically with counter weight. Complete with fluorescent light. Centrifugal motor fan with S.S. fitted with the exhaust fumes will vented with PVC pipe outlet.

Key Specification :

Test Chamber Size	2 Feet X 2feet
Blower Motor	1440rpm Single Phase
Main Door	Glass Viewing Single Hand Operated (Sliding Glass Door)
Work Table Material	Ceramic Glazed Tiles

Highlights :

Material	Out body Mild Steel powder coated & Inner body Stainless Steel.
